

SUMMARY PROSPECTUS

JOHNSON ENHANCED RETURN FUND

Fund Ticker: JENHX

May 1, 2020

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports like this one will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available at johnsonmutualfunds.com, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically by contacting the Fund at 1-800-541-0170 or, if you own these shares through a financial intermediary, by contacting your financial intermediary.

You may elect to receive all future reports in paper free of charge. You can inform the Fund that you wish to continue receiving paper copies of your shareholder reports by contacting the Fund at 1-800-541-0170. If you own shares through a financial intermediary, you may contact your financial intermediary or follow instructions included with this document to elect to continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with the fund complex or at your financial intermediary.

Before you invest, you may want to review the Fund's Prospectus and Statement of Additional Information, which contains more information about the Fund and its risks. The Fund's Prospectus and Statement of Additional Information, both dated May 1, 2020, are incorporated by reference into this Summary Prospectus. You can find the Fund's Prospectus and other information about the Fund online at www.johnsonmutualfunds.com. You can also get this information at no additional cost by calling (800) 541-0170 or by sending an email request to prospectus@johnsonmutualfunds.com.

TICKER: JENHX

FUND SUMMARY

INVESTMENT OBJECTIVE

Outperform the Fund’s benchmark, the S&P 500 Index, over a full market cycle.

FEES AND EXPENSES

The tables below describe the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>	
Redemption Fee	None
Exchange Fee	None
Annual Fund Operating Expenses <i>(expenses that are deducted from fund assets)</i>	
Management Fees	0.35%
Other Expenses	0.00%
Acquired Fund Fees and Expenses ¹	0.01%
Total Annual Fund Operating Expenses	0.36%

1 “Acquired Fund Fees and Expenses” are comprised solely of fees and expenses incurred indirectly by the Fund as a result of investment in shares of one or more Acquired Funds. Numbers are rounded. Acquired Fund Fees and Expenses are the indirect costs of investing in other funds. The Total Annual Fund Operating Expenses and Net Expenses will not correlate to the expense ratios in the Fund’s financial statements or the Financial Highlights in the prospectus because the financial statements include only the direct operating expenses incurred by the Fund, not the indirect costs of investing in other funds.

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example uses the same assumptions as other mutual fund prospectuses: a \$10,000 initial investment for the time periods indicated, 5% annual total return, constant operating expenses (except for fee waivers in the first year), and sale of all shares at the end of each time period. Although your actual expenses may be different, based on these assumptions your cost will be:

	1 Year	3 Years	5 Years	10 Years
Enhanced Return Fund	\$37	\$116	\$202	\$456

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 46.04% of the average value of its portfolio.

PRIMARY INVESTMENT STRATEGIES

The Fund invests in the large cap equity market through the use of S&P 500 index futures, combined with alpha generating short duration investment-grade fixed income securities.

The Fund’s adviser seeks to have notional exposure to equity index futures contracts in a value approximately equal to the Fund’s net assets. Utilizing equity index futures contracts to replicate returns of the underlying equity index typically requires less than 10% of the Fund’s assets to be posted as collateral. This effect is referred to as “leverage.” The Fund attempts to track an underlying equity index consisting of a representative sampling of the leading large capitalization companies in the leading industries in the U.S. economy. The equity index futures are used only for replication of returns, not speculation. The Fund also may invest in options on equity index futures and equity index exchange-traded funds (“ETFs”).

The Fund invests the balance of its assets primarily in a broad range of investment grade fixed income securities, including bonds, notes, domestic and foreign corporate and government securities, government agency securities, mortgage-backed securities, collateralized mortgage obligations, asset backed securities, municipal securities, and short-term obligations. The Fund does not limit itself to securities of a particular maturity range but will normally maintain a dollar weighted average duration between 1 and 3 years. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security’s price to changes in interest rates. For example, the value of a portfolio of fixed income securities with an average duration of one year would generally be expected to decline by approximately 1% if interest rates rose by one percentage point.

PRINCIPAL RISKS

As with any mutual fund investment, the Fund's returns may vary and you could lose money.

Company Risk — The Fund value might decrease in response to the activities and financial prospects of an individual company.

Market Risk — The Fund value might decrease in response to general market and economic conditions.

Volatility Risk — Common stocks (and indexes of common stocks) tend to be more volatile than other investment choices.

ETF Risk — ETFs are subject to investment advisory fees and other expenses, which will be indirectly paid by a Fund. As a result, your cost of investing in a Fund will be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest directly in equity securities. ETFs are listed on national stock exchanges and are traded like stocks listed on an exchange. ETF shares may trade at a discount or a premium in market price if there is a limited market in such shares. ETFs are also subject to brokerage and other trading costs, which could result in greater expenses to a Fund. ETFs in which a Fund invests will not be able to replicate exactly the performance of the indices they track.

Futures Risk — The Fund's use of futures contracts involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include leverage risk and correlation or tracking risk. Because futures require only a small initial investment in the form of a deposit or margin, they involve a high degree of leverage. Under certain market conditions, futures contracts may become illiquid. As a result, the Fund may be unable to close out its futures contracts at a time which is advantageous or take an offsetting defensive position, potentially resulting in significant losses for the Fund.

Leveraging Risk — Leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund's portfolio. When the Fund is leveraged, it can lose more than the principal amount invested.

Correlation Risk — Due to futures contract size limitations, the Fund's assets may be slightly under-invested or slightly over-invested compared to the underlying index, which could cause the Fund to be slightly less or more volatile than the underlying index, and the Fund's returns from the futures contracts may not mirror the underlying index.

Interest Rate Risk — Prices of fixed-income securities rise and fall in response to changes in the interest rate paid by similar securities. Generally, when

interest rates rise, prices of fixed-income securities fall. However, market factors, such as the demand for particular fixed-income securities, may cause the price of certain fixed-income securities to fall while the prices of other securities rise or remain unchanged. Interest rate changes have a greater effect on the price of fixed-income securities with longer maturities. A potential rise in interest rates may result in periods of volatility and increased redemptions.

Credit Risk — The issuer of the fixed income security (including some Government Agencies) may not be able to make interest and principal payments when due, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes.

Prepayment Risk — The value of the mortgage securities held by the Fund may go down as a result of changes in prepayment rates on the underlying mortgages.

Specific Maturity Risk — The specific maturities in which the Fund invests may fall in value more than other maturities. Although the Fund's bonds are primarily short term, the bonds with longer maturities will fluctuate more than bonds with shorter maturities.

Management Risk — The Adviser's judgments about the attractiveness, value and potential appreciation of particular securities in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser's judgment will produce the desired results.

Market and Geopolitical Risk — The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on both the U.S. and global financial markets. The current novel coronavirus (COVID-19) global pandemic and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, as well as the forced or voluntary closure of, or operational changes to, many retail and other businesses, has had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described

above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment.

Mortgage-Backed Securities Risks — Mortgage-backed securities represent interests in “pools” of mortgages. Mortgage-backed securities are subject to “prepayment risk” and “extension risk.” Prepayment risk is the risk that, when interest rates fall, certain types of obligations will be paid off by the obligor more quickly than originally anticipated and the Fund may have to invest the proceeds in securities with lower yields. Extension risk is the risk that, when interest rates rise, certain obligations will be paid off by the obligor more slowly than anticipated causing the value of these securities to fall. Small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain mortgage-backed securities. These securities also are subject to risk of default on the underlying mortgage, particularly during periods of economic downturn.

Asset-Backed Securities Risk — Asset-backed securities are subject to credit risk because underlying loan borrowers may default. Additionally, these securities are subject to prepayment risk because the underlying loans held by the issuers may be paid off prior to maturity. The value of these securities may go down as a result of changes in prepayment rates on the underlying loans. During periods of declining interest rates, prepayment rates usually increase and the Fund may have to reinvest prepayment proceeds at a lower interest rate.

Municipal Securities Risk — Municipal securities are subject to the risk that legislative changes and local and business developments may adversely affect the yield or value of the Fund’s investments in such securities. Municipal general obligation debt issuers may not be able to levy or collect enough taxes as necessary to make full and timely payments to investors. Municipal revenue obligation debt issuers may experience shortfalls in revenues, such as sales taxes, fuel taxes, or hotel occupancy taxes, generated by the particular project being financed. The Fund may be more sensitive to adverse economic, business or political developments if it invests a substantial portion of its assets in bonds of similar projects (such as those relating to education, health care, housing, transportation, and utilities), industrial development bonds, or in bonds from issuers in a particular state.

Foreign Securities Risk — Foreign securities may be subject to special risks such as changes in restrictions on foreign currency transactions and rates of exchange, and changes in the administration or economic and monetary policies of foreign governments.

ANNUAL TOTAL RETURNS

The chart and table below show the variability of the Fund’s returns, which is one indicator of the risks of investing in the Fund. The bar chart shows changes in the Fund’s returns from year to year since the Fund’s inception. The table shows how the Fund’s average annual total returns over time compare to those of a broad-based securities market index. Of course, the Fund’s past performance (before and after taxes) is not necessarily an indication of its future performance. Update performance information is available at no cost by visiting www.johnsonmutualfunds.com or by calling 1-800-541-0170.

During the period shown, the highest return for a calendar quarter was 14.87% in the first quarter of 2019, and the lowest return was -13.70% in the fourth quarter of 2018.

For the Periods ended December 31, 2019	1 Year	5 Years	10 Years
Return Before Taxes	33.80%	11.79%	14.18%
Return After Taxes on Distributions	29.05%	8.35%	10.85%
Return After Taxes on Distributions and Sale of Fund Shares	21.13%	8.03%	10.33%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	31.49%	11.70%	13.56%

The S&P 500 Index is the established benchmark.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax

returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

INVESTMENT ADVISER

Johnson Investment Counsel, Inc.

PORTFOLIO MANAGERS

The Fund is managed by a team of portfolio managers. Michael Leisring, CFA, has been a member of the Fund management team since 2003 and the team leader since 2013. Jason Jackman, CFA, and Dale Coates, CFA, have been members of the Fund management team since its inception. Brandon Zureick, CFA, has been a member of the management team since 2014. David Theobald, CFA, has been a member of the management team since 2016.

PURCHASE OR SALE OF FUND SHARES

Shares may be purchased or redeemed at the Fund's net asset value (NAV) next determined after receipt of your order, by check, wire, electronic bank transfer or exchange. The minimum initial investment for the Fund is \$1,000,000. The minimum for additional purchases is \$100. The Adviser may, in its sole discretion, waive these minimums for existing clients of the Adviser and other related parties, as well as in certain other circumstances. You may buy or sell shares on any business day. This includes any day that the Fund is open for business, other than weekends and days on which the New York Stock Exchange (NYSE) is closed, including holidays. Purchases and redemptions can be made through the Fund's Transfer Agent, Johnson Financial, Inc., 3777 West Fork Road, Cincinnati, OH 45247. You may contact the Transfer Agent at 800-541-0170 for information about how to purchase or redeem Fund shares by wire, electronic bank transfer or exchange.

TAX INFORMATION

Dividends and capital gain distributions you receive are subject to federal income taxes and may also be subject to state and local taxes.
