EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your cost will be:

	<u>1</u> <u>Year</u>	<u>3</u> <u>Years</u>	<u>5</u> <u>Years</u>	<u>10</u> <u>Years</u>
Equity Income Fund				
Class I	\$ 77	\$241	\$418	\$ 933
Class S	\$103	\$320	\$555	\$1,229

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its

portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 22.66% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES OF THE FUND

The Fund invests primarily in equity securities of larger-sized U.S. companies (those with a market capitalization above \$20 billion) that its Adviser believes offer opportunities for above-average dividend income and capital growth. The Adviser seeks companies with high quality characteristics such as sustainable competitive positions that have high-quality earnings, financial strength, strong or improving balance sheets, free cash flow, and shareholder-oriented managements. The Adviser also considers current dividend yield and dividend growth, as well as its analysis of the share price of these companies using traditional valuation measures. The Fund may invest a portion of its assets in preferred stocks. The Fund may sell a security if the security reaches the Adviser's valuation target, if the Adviser believes the company's fundamentals have changed, or if the company is not performing as expected. Under normal circumstances, at least 80% of the Fund's total assets will be invested in income-producing equity securities. For purposes of the 80% test, equity securities include common stock, preferred stocks and exchange traded funds (ETFs) that invest primarily in equity securities.

PRINCIPAL RISKS OF INVESTING IN THE FUND

As with any mutual fund investment, the Fund's returns may vary and you could lose money.

Company Risk — The Fund value might decrease in response to the activities and financial prospects of an individual company.

Management Risk — The Adviser's judgments about the attractiveness, value and potential appreciation of particular securities in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser's judgment will produce the desired results.

Market Risk — The Fund value might decrease in response to general market and economic conditions.

Market and Geopolitical Risk — The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may

adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on both the U.S. and global financial markets. The recent novel coronavirus (COVID-19) global pandemic and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, as well as the forced or voluntary closure of, or operational changes to, many retail and other businesses, has had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment.

Volatility Risk – Common stocks tend to be more volatile than other investment choices.

Risks of Exchange Traded Funds (“ETF”) – Investment in an ETF carries security specific risk and market risk. The performance of an ETF may not completely replicate the performance of its underlying index. ETF shares may trade at a premium or discount to their NAV. The Fund will indirectly pay its proportionate share of any fees and expenses paid by the ETF in which it invests in addition to the fees and expenses paid directly by the Fund, many of which may be duplicative. The cost of investing in the Fund will generally be higher than the cost of investing directly in ETFs.

Preferred Stock Risk – Preferred stocks are securities that have characteristics of both common stocks and corporate bonds. Preferred stocks may receive dividends but payment is not guaranteed as with a bond. These securities may be undervalued because of a lack of analyst coverage resulting in a high dividend yield or yield to maturity. The risks of preferred stocks are a lack of voting rights and the Adviser may incorrectly analyze the security, resulting in a loss to the Fund. Furthermore, preferred stock dividends are not guaranteed and management can elect to forego the preferred dividend, resulting in a loss to the Fund.

AVERAGE ANNUAL TOTAL RETURNS

The chart and table below show the variability of the Fund's returns, which is one indicator of the risks of

investing in the Fund. The bar chart shows changes in the Fund's returns from year to year since the Fund's inception. The table shows how the Fund's average annual total returns over time compare to those of a broad-based securities market index. Of course, the Fund's past performance (before and after taxes) is not necessarily an indication of its future performance. Updated performance information is available at no cost by visiting www.johnsonmutualfunds.com or by calling 1-800-541-0170.

Average Total Returns for the Equity Income Fund as of December 31 of each year

During the period shown, the highest return for a calendar quarter was 17.01% in the second quarter of 2020, and the lowest return was -21.02% in the first quarter of 2020.

For the Periods ended December 31, 2022	1 Year	5 Years	10 Years
Class I:			
Return Before Taxes	-9.74%	10.73%	11.91%
Return After Taxes on Distributions	-11.40%	8.82%	9.99%
Return After Taxes on Distributions and Sale of Fund Shares	-5.20%	7.99%	9.19%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	-18.11%	9.42%	12.56%

The S&P 500 Index is the established benchmark.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold

their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.
